Note: Data is representative of Spring 2010 online offerings; additional classes are continually added. Rio Salado has more than 100 online classes in its system. The number offered fluctuates each term.

## MUCK IT UP! Hybrid Program Offers Hands-on Learning

Get ready to get your hands dirty! A new hybrid program at Rio Salado College lets students study online and practice what they've learned – by growing it.

Rio's new **Sustainable Food Systems** program is changing the way students learn through hybrid classes. Students get the best of both worlds – the convenience and flexibility of online classes and the practicality of hands-on learning.

"This is a new hybrid class," said instructor Peter Conden, who teaches Gardening Practices and Techniques. "The students learn the theory online, and then they work in the 4,400 square-foot community garden to fulfill the lab section of the class."

The new community garden is located at Rio's headquarters, 2323 W. 14th St., in Tempe.

Recently, the first lab section was held at the garden, and students and instructors gathered to ready the garden.

"Today we prepared the garden for plants and put some of the theories that I studied to practice," said student Cody Boers. "It was a surprisingly fun class."

According to Conden, the theories the students practice in the garden will change throughout the year as the weather changes.

"The Southwest is very different from other parts of the country," said Conden. "Students study how the climate influences what is grown in a garden, and then they have to develop a plan for that time of the year."

The climate wasn't the only thing affecting the garden. The class also secured the area to keep out local wildlife.

As the garden takes shape, it also will impact what is served in the new Rio Café.

Items grown in the garden will be used in Rio's culinary classes, which are part of the Sustainable Foods Program. These classes will be preparing the meals served in the café.

"The entire program is one big cohesive laboratory," said Conden. "Students in the café and garden will work together toward a goal of zero waste."

**WHAT'S New @ Rio?**

**TRANSFERASU**  
Several new transfer opportunities are available to Rio students through the Maricopa ASU Pathways Program (MAPPS):  
Geography (Meteorology/Climatology), BS; Geography or Geography (Urban Studies), BS; Geography, BA; Anthropology, BA; Philosophy, BA; Religious Studies, BA; Economics; College of Liberal Arts and Sciences, BA; Women and Gender Studies, BA; W.P. Carey MAPPS.

**COMING SOON!**  
Get ready for luscious fruits when the new Café @ Rio opens its doors in late spring. And keeping with Rio's green efforts, the café will run by students in Rio's Sustainable Foods Program, and will feature items grown in Rio's Tempe community garden.

# XP3

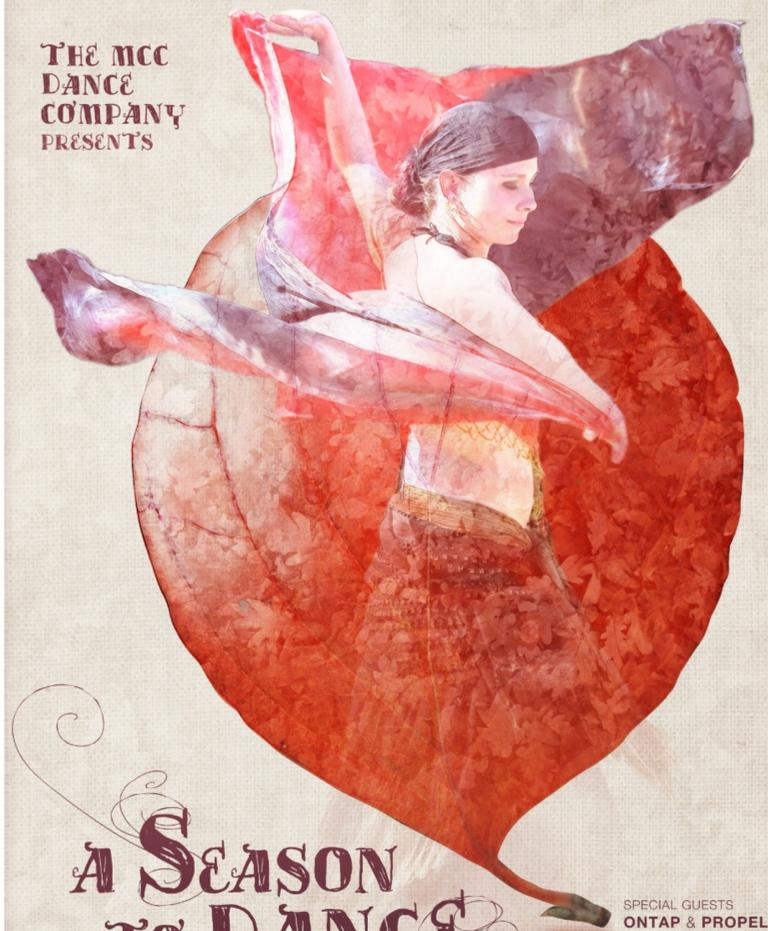

## BUILT FOR LIFE

Built for those who work in extreme, hazardous, and/or isolated environments, the Sonim XP3 is the latest in Sonim's lineup of ultra rugged mobile phones. Designed for professionals who are exposed to the most hostile environments every day and backed by Sonim's industry-leading 3-year Comprehensive Warranty, the Sonim XP3 provides the level of extreme reliability and productivity our customers demand.

# Portable Fire Extinguisher: Safer, Smarter Use

- + Explore problems with bulk, accessibility, & misuse
- + Identify extinguisher types & use case scenarios
- + Study form & function through study models & 3D prototypes

FireGrip is designed to be portable and user friendly. Its versatile functionality and ease of use provides a better user experience and results.

- Features includes:
1. Single hand operation
  2. Shift canister angle for centered weight
  3. Durable & lightweight handle with secure grip
  4. Easy connections of the the canister and handle body
  5. Slip resistant rubberized grip

## 01 3D RENDERING

### USE CASES

- General household use
- Outdoor - Camping
- Commuters & on a road trip (cars and mobile homes)
- Small business and studios

There are several types of fire extinguishers and they are color coded. Selecting a right type would prevent potential endangerment.

- WATER: used for Class A fires
- FOAM: used for Classes A & B fires
- DRY POWER: used for Classes A, B & C fires
- CO2: used for Class B & electrical fires

- Class A: SOLIDS such as paper, wood, plastic etc
- Class B: FLAMMABLE LIQUIDS such as petrol, oil
- Class C: FLAMMABLE GASES such as propane, butane
- Class D: METALS such as aluminium, magnesium etc
- Class E: Fires involving ELECTRICAL APPARATUS
- Class F: Cooking OIL & FAT etc

Materials Used: Blue Foam | Guesso | Primer

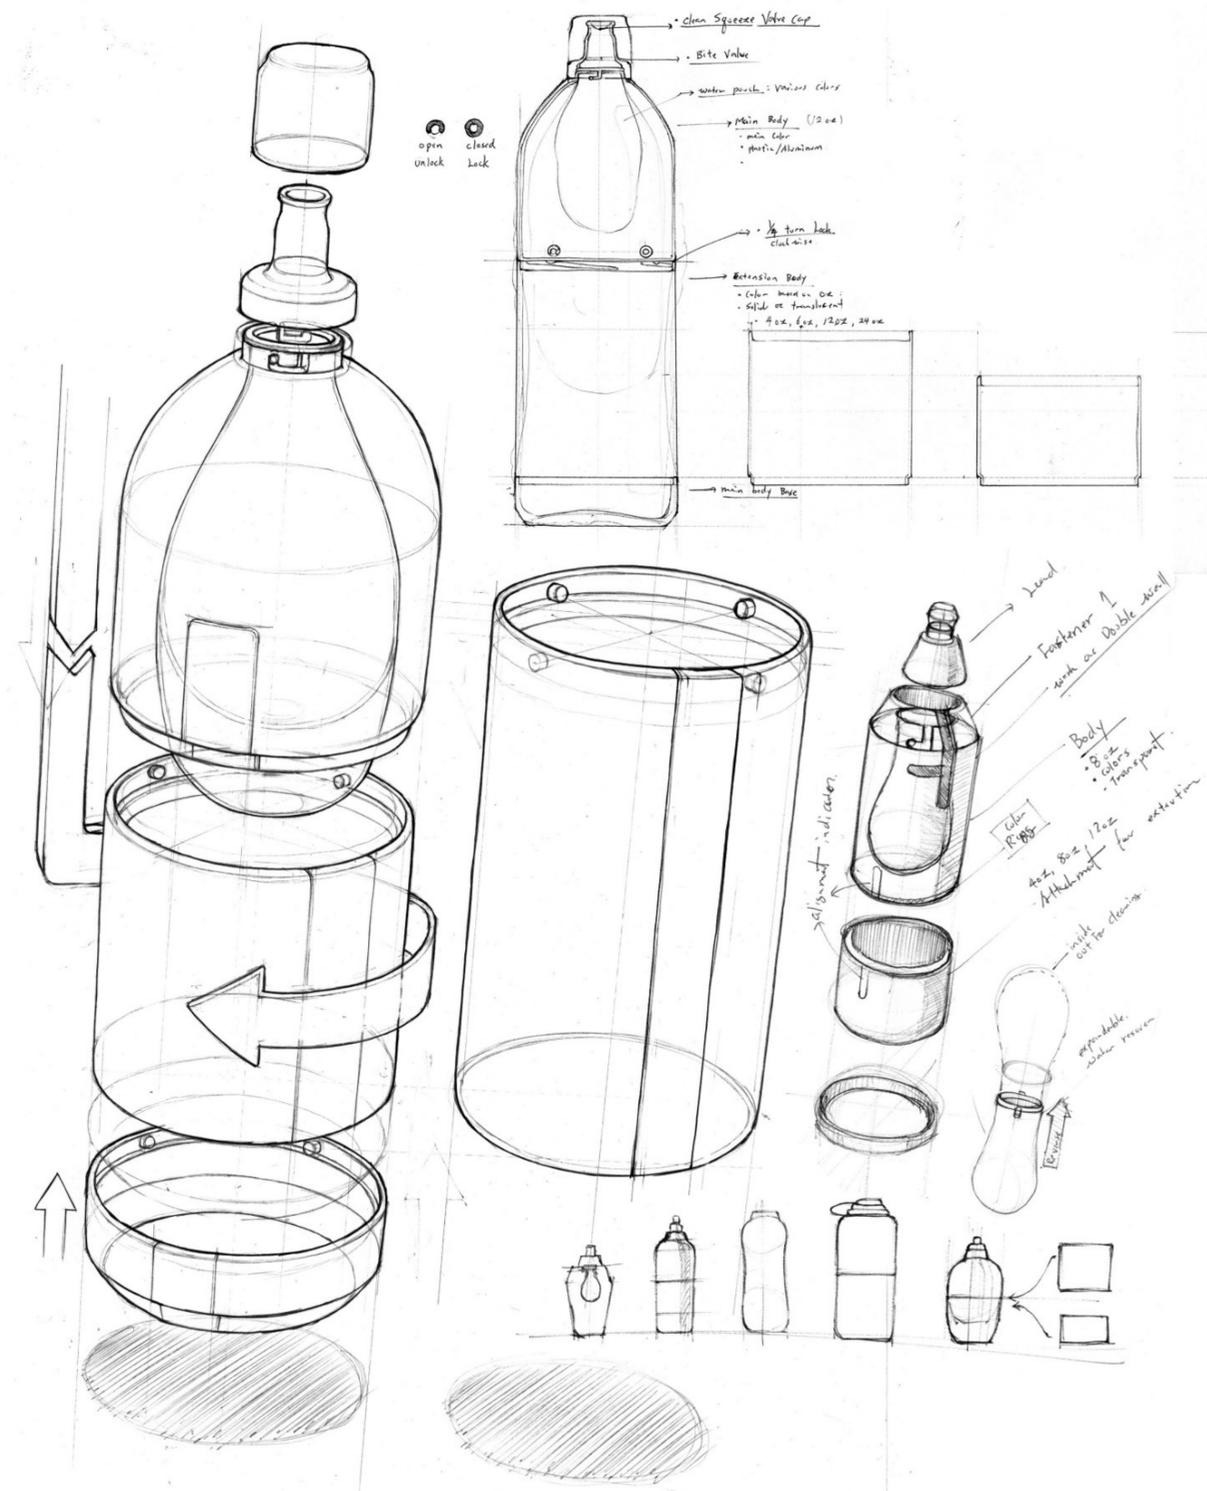

## 02 IDEATION SKETCHES

A few dozens of ideation sketches were drawn to study forms and its features and functionality

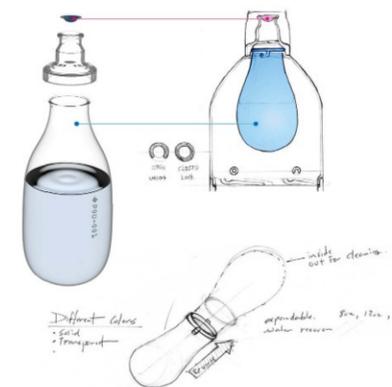

# Reusable Water Bottle Concept: Modular Design

- + Explore concepts for modular, multi-size functionality
- + Study mechanical fit & modular connection methods
- + Ground concept in research on single-use waste & sustainability

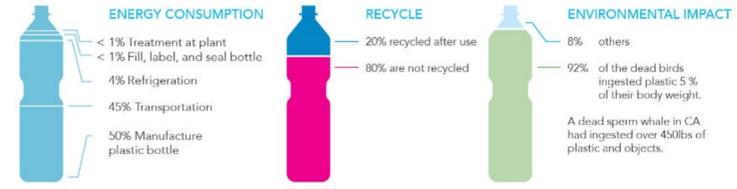

Multi-One (MO) was designed to reduce the amount of plastic waste that ends up in landfills and our environment each year. To achieve this, several design features have been implemented that will set MO apart from other reusable water bottles.

- FEATURES**
- 1. CLEAN VALVE CAP**  
Valve prevents air intake when not in use as well as accidental spills.  
- Bite activated
  - 2. WATER POUCH**  
Made of flexible and durable material that expands to the capacity of the adjustable bottle.  
**Tilt Free Drink:** Because it's air tight, the pouch also works as a straw.  
**Easy Clean:** Simply flip inside out for easy cleaning.

**FACTS:**  
16.2 gallons of oil and 7 liters of water to manufacture a 1-liter water bottle. It takes 275,000 tons of plastic are used each year, producing 15 million water bottles daily.

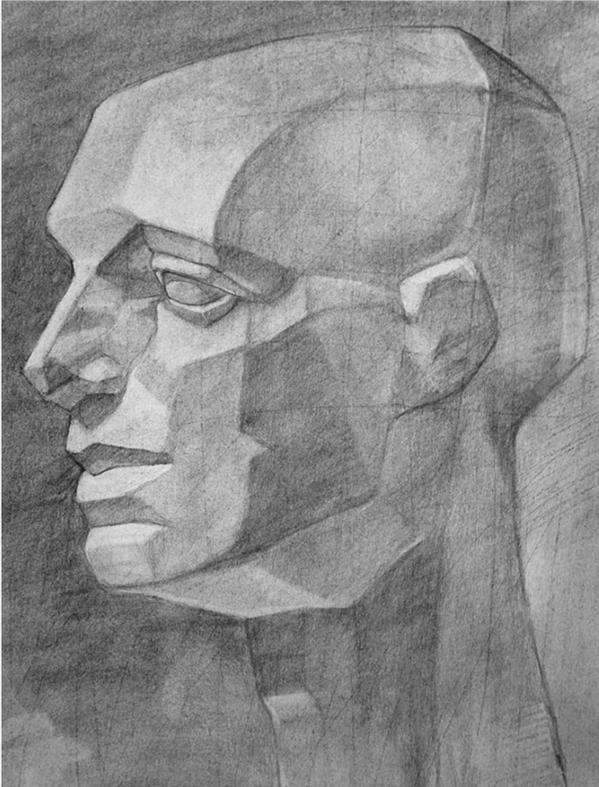

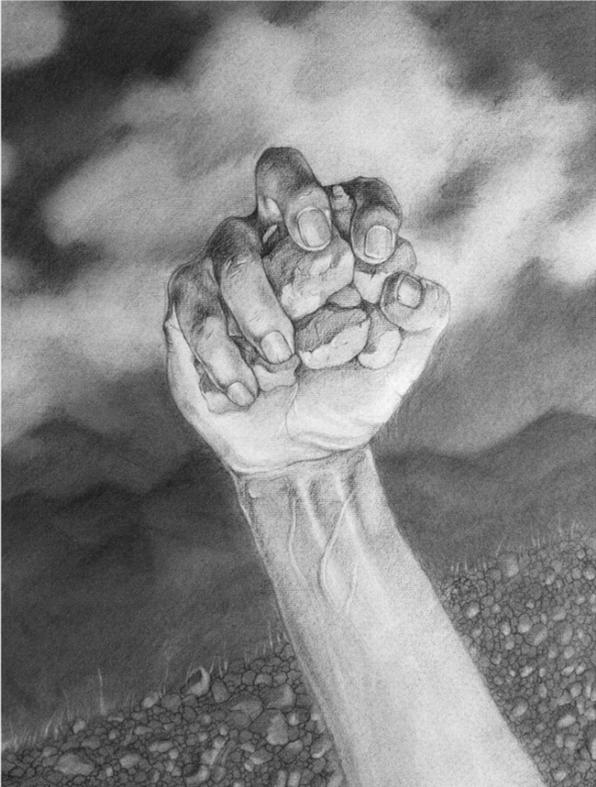

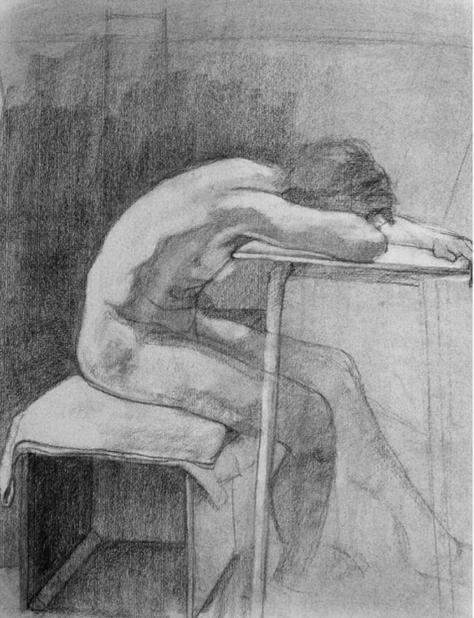

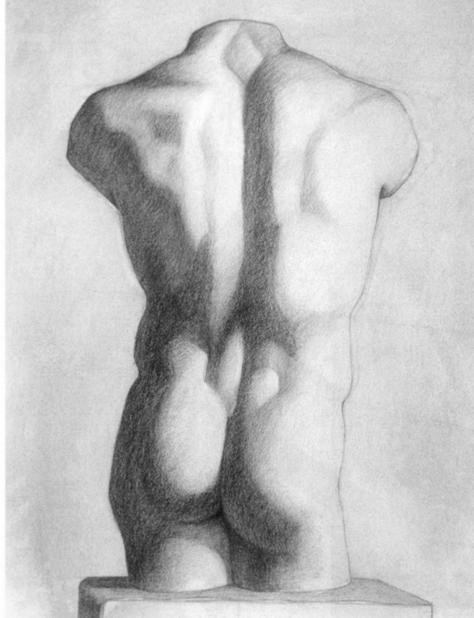

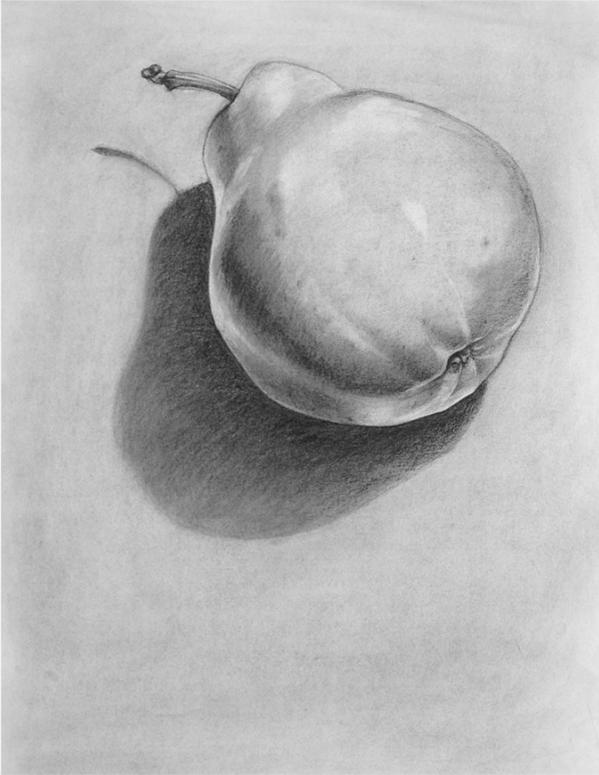

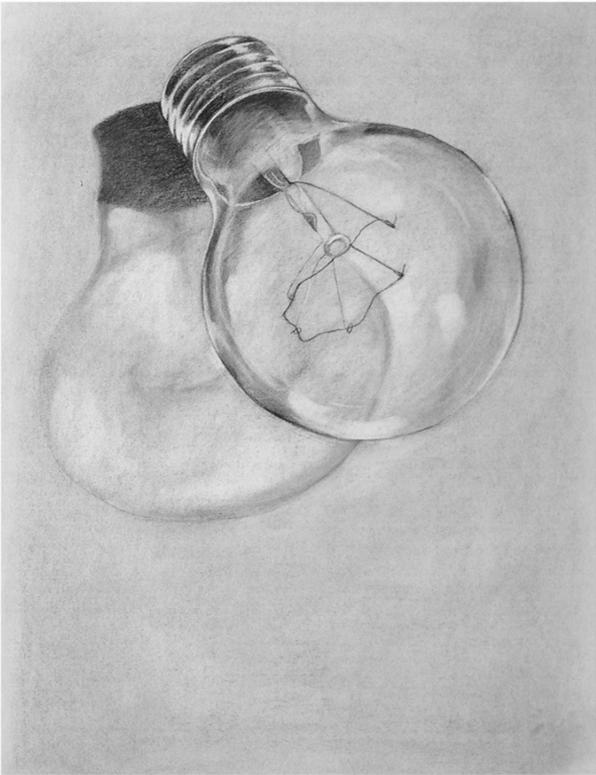

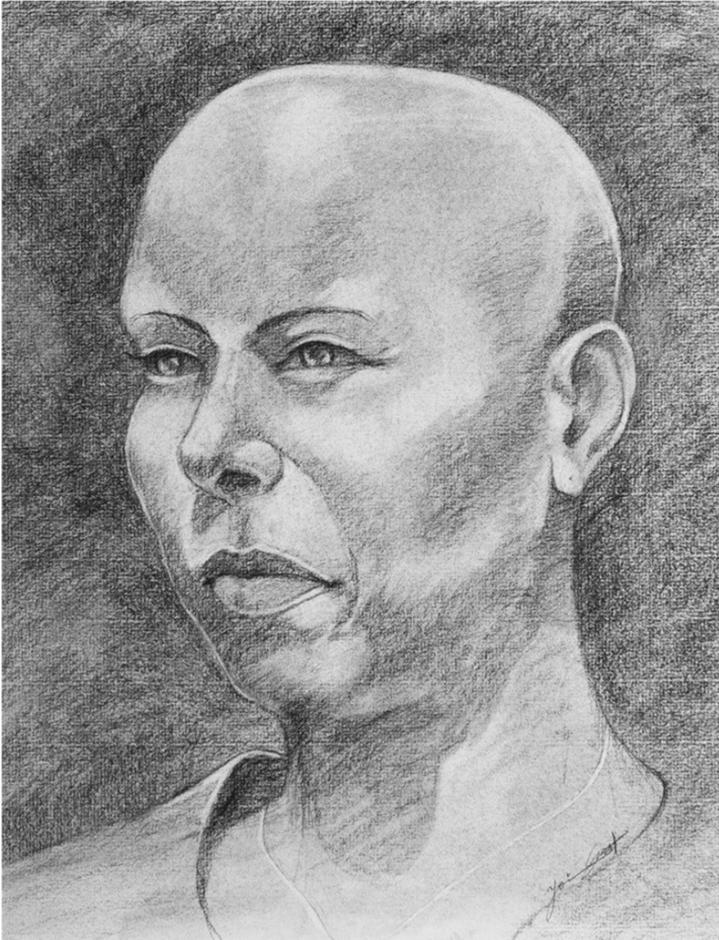

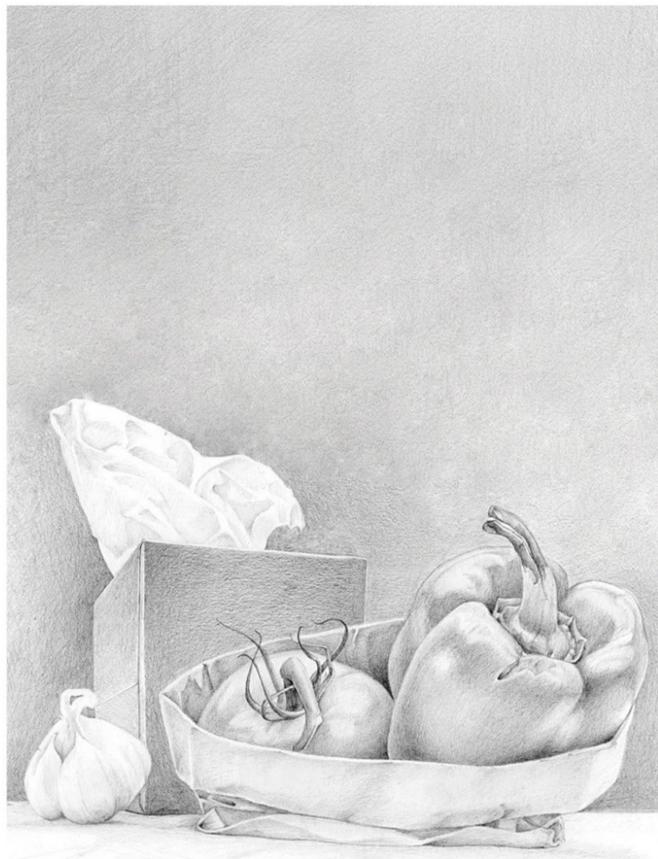

**60M** 60 million plastic WATER BOTTLES are used EVERY DAY in the US.  
**700YRS** 700 years for plastic to decompose  
18,834,000,000 water bottles end up in landfills each year.

# Observational Drawing: Line, Form, and Perspective

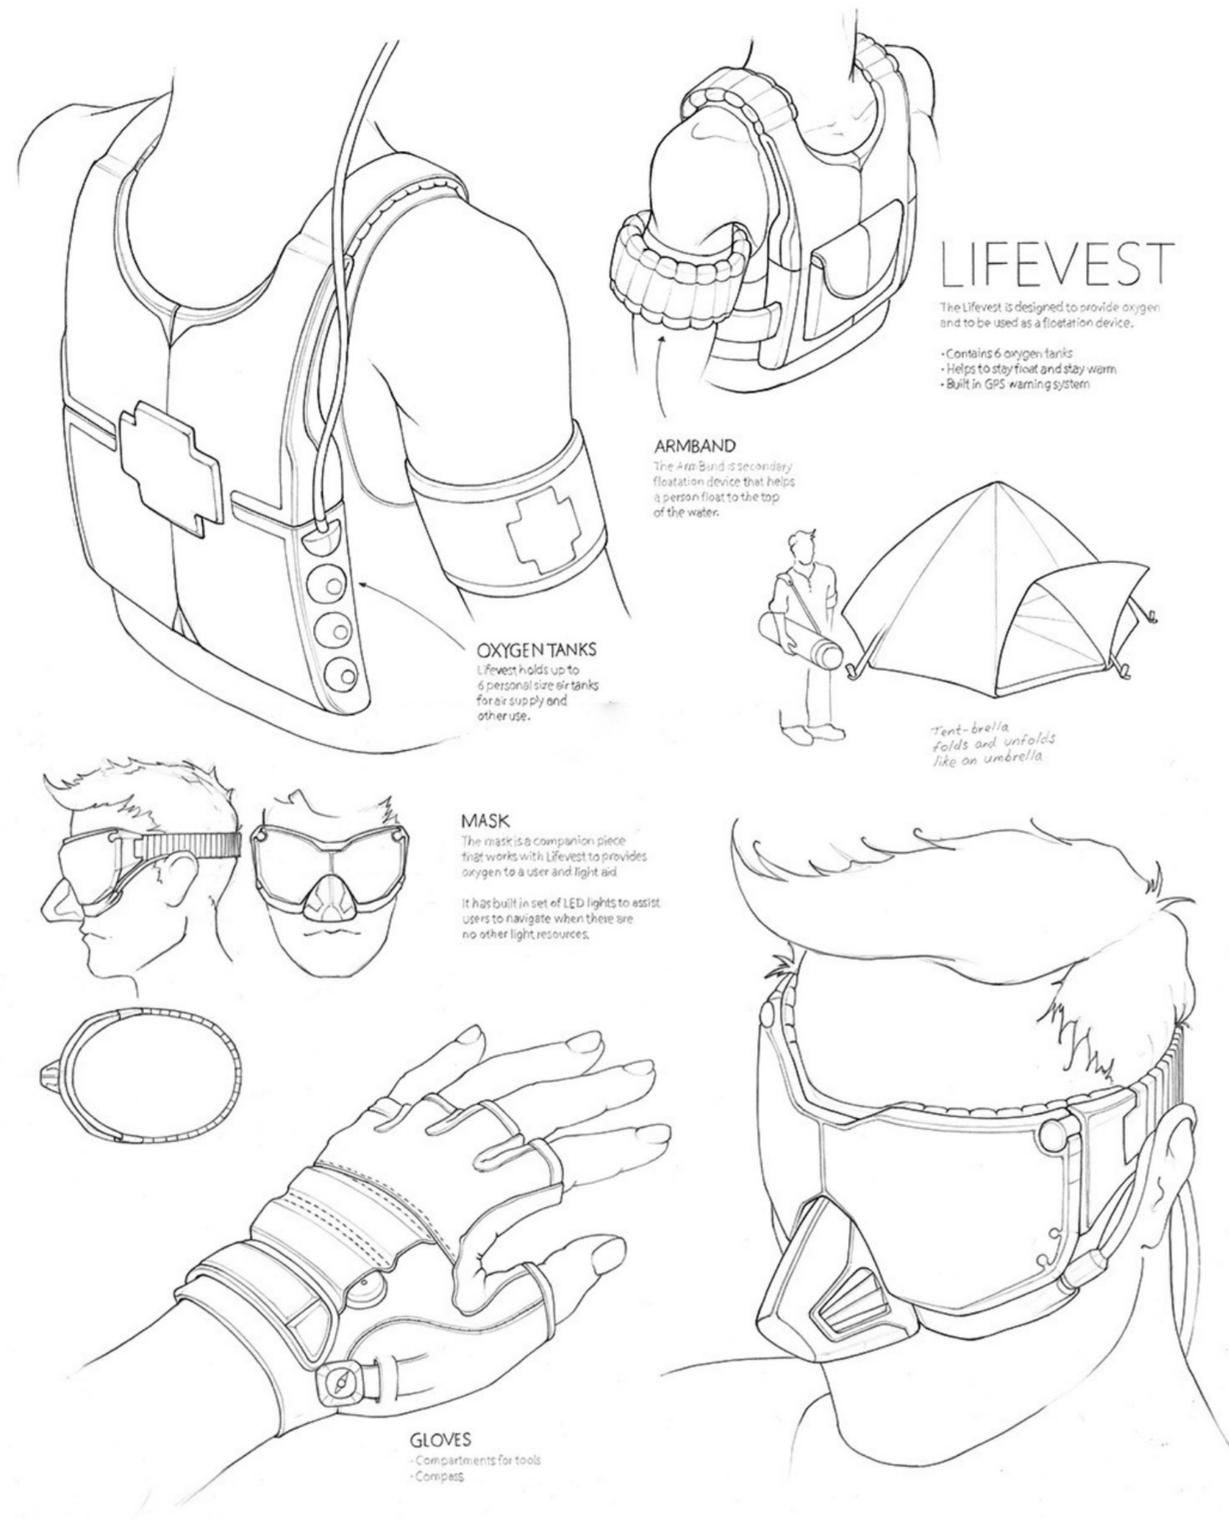

- + Practice construction, contour, and gesture techniques
- + Apply perspective and proportion to build spatial accuracy
- + Explore volume, texture, and form through observation studies

## LifeVest Concept: Integrated Survival Kit Design

- + Explore multifunctional survival kit solutions
- + Develop concepts for eye protection, oxygen, & flotation support
- + Express ideas through exploratory sketching & form studies

## Sketch Study: Medicine Bottle Form and Proportion

- + Use construction lines to define structure
- + Apply perspective techniques for accuracy
- + Explore volume and scale through line weight
